PRAKASH INDUSTRIES

&

KEJAL BATTERY CORPORATION

Under the Leadership of Mr. Ankit Prakash Gupta, Managing Director (Since 2005)

Powering the Future Since 1982

SOLAR ENERGY & POWER SOLUTIONS

Battery Manufacturing Since 1982 | Solar Solutions Since 2010

Product Brand: RISE-X – Solar & Tubular Batteries

From Powering Homes to Energising Industries – One Trusted Name for Four Decades

OUR LEGACY & HISTORY

Founder & Inspiration

Late Shri Dharmendra Prakash Gupta

The journey of Prakash Industries and Kejal Battery Corporation is built on trust, uncompromised quality, and technical excellence. What began as a small manufacturing unit in Aligarh has, over four decades, grown into a trusted name synonymous with reliability in the power storage and renewable energy industry. Every product that carries the RISE-X name reflects the founder's original vision: durable engineering, honest business practice, and a genuine commitment to customer satisfaction.

A Timeline of Growth

1982 – Battery Manufacturing

Founded by Late Shri Dharmendra Prakash Gupta in 1982, the company set benchmark quality standards in battery manufacturing. From the very first unit produced, the focus was on rugged construction, long service life, and dependable performance – principles that continue to guide production even today.

2005 – Modern Expansion

With Mr. Ankit Prakash Gupta taking charge of the company's operations in 2005, the business was engineered with advanced processes and next-generation technologies to scale manufacturing operations to new heights. Investment in modern plant machinery, stricter quality-control protocols, and a growing skilled workforce allowed the company to serve a wider customer base across Uttar Pradesh and neighbouring regions.

2010 – Solar Revolution

Recognising the shift toward clean, sustainable energy, the company ventured into renewable energy in 2010. Since then it has delivered rooftop, commercial, industrial, and megawatt-scale solar projects, helping homes, businesses, and institutions reduce their electricity costs while contributing to a greener planet.

Today – A Trusted Energy Partner

As an authorised vendor under the PM Surya Ghar Scheme, Prakash Industries and Kejal Battery Corporation continue to expand their footprint in solar installation and battery manufacturing, backed by a growing team of trained engineers, technicians, and after-sales support staff.

WHY CHOOSE US

Choosing the right energy partner is one of the most important decisions for your home or business. Here is why thousands of customers continue to trust Prakash Industries and Kejal Battery Corporation:

- 40+ Years of Manufacturing & Service Experience – Four decades of hands-on expertise in battery manufacturing and power solutions, giving customers the confidence of proven, time-tested reliability.
- High-Capacity & Durable RISE-X Tubular Batteries – Engineered for long life cycles, low maintenance, and consistent performance even under heavy daily use.
- On-Grid, Off-Grid & Hybrid Solar Solutions – Customised systems designed to match every requirement, whether it is a residential rooftop, a commercial establishment, or an industrial facility.
- Projects Ranging from 3 kW to Megawatt (MW) Scale – Capable of executing everything from small rooftop installations to large-scale industrial and utility solar plants.
- Authorized Vendor for PM Surya Ghar Scheme – Government-recognised partner helping households access subsidised solar rooftop installations with complete documentation support.
- Rapid Maintenance & Comprehensive After-Sales Support – A dedicated service team ensures quick response times, routine maintenance, and long-term peace of mind for every customer.
- End-to-End Project Execution – From site survey and system design to installation, commissioning, and grid synchronisation, every step is managed in-house by trained professionals.
- Genuine, Certified Components – Only quality-tested panels, inverters, batteries, and balance-of-system components sourced from trusted OEM partners are used in every project.

PRODUCTS & SERVICES

1. RISE-X Solar & Tubular Batteries

High-efficiency, long life-cycle, and low-maintenance batteries designed for both solar energy storage and everyday power backup needs. RISE-X tubular batteries use robust plate technology to withstand deep discharge cycles, making them ideal for homes, offices, and industrial backup applications where consistent power is critical.

2. Solar Power Plants (3 kW to Megawatt Scale)

Turnkey On-Grid and Hybrid installations for commercial and industrial plants. The team handles the complete project lifecycle – feasibility assessment, engineering design, procurement, installation, and commissioning – ensuring every plant is optimised for maximum energy yield and long-term durability.

3. Inverters & Hybrid Systems

3-Phase and high-capacity industrial solar inverters with grid synchronisation. These systems are selected and configured to deliver stable, efficient power conversion, whether the requirement is grid-tied, off-grid, or a hybrid combination of both.

4. Rooftop Solar for Homes & Businesses

Complete residential and commercial rooftop solar packages, including structural assessment, panel installation, net-metering assistance, and subsidy documentation support under applicable government schemes.

5. Annual Maintenance & After-Sales Service

Scheduled maintenance visits, performance monitoring, and rapid-response repair support to keep every installation – whether a home battery or a megawatt-scale plant – running at peak efficiency throughout its service life.

Our Installation Process

- Site Visit & Feasibility Study – Assessing roof/land space, load requirements, and shading conditions.
- Custom System Design – Engineering a solution sized precisely to the customer's energy needs and budget.
- Approvals & Documentation – Assistance with net-metering, subsidy applications, and statutory approvals.
- Installation & Commissioning – Professional installation by trained technicians, followed by thorough testing.
- Handover & After-Sales Support – Customer orientation, warranty registration, and ongoing maintenance support.

ASSOCIATED BRANDS

Proud to work with leading names in the solar and battery industry:

[Logo Space] **Adani Solar**	*[Logo Space]* **Tata Power Solar**	*[Logo Space]* **Luminous / Microtek**
[Logo Space] **Waaree Energies**	*[Logo Space]* **Exide / Amaron**	*[Logo Space]* **Growatt / Livguard**

CLIENTS & PROJECTS

Key Commercial & Industrial Projects (3 kW to MW):

[Logo Space] **Krishnam Agro Industries**	*[Logo Space]* **Commercial Client**	*[Logo Space]* **Industrial Client**
[Logo Space] **Institutional Client**	*[Logo Space]* **PM Surya Ghar Projects**	*[Logo Space]* **Client / Partner**
